INTRODUCTION

William Hughes Ltd is an established manufacturer of helical springs, wireforms, and welded assemblies for the automotive, aerospace and industrial markets.

In order to exceed our customers' expectations, William Hughes Ltd expects total quality and value in the products and services it receives from its suppliers.

The company also recognises the first requirement in establishing a satisfactory relationship between ourselves and our suppliers is to clearly define our requirements.

This document sets out to cover basic requirements for the ordering, processing, manufacturing and shipping to William Hughes Ltd of product from your company.

Compliance with this document is an integral part of maintaining William Hughes' supplier approval.

CONTENTS

- QUALITY SYSTEMS
- ORDERS
- SUPPLIER SUB-CONTRACTING
- CONTROL OF DOCUMENTS / RECORDS
- PRODUCT CERTIFICATION
- IDENTIFICATION AND TRACEABILITY
- CONCESSION / CHANGE REQUEST
- NON-CONFORMING PRODUCT
- NOTIFICATION OF CHANGES
- PACKING AND DELIVERY
- SUPPLIERS OF AUTOMOTIVE PARTS/PROCESSES
- VENDOR RATING
- COUNTERFEIT PARTS POLICY
- ETHICS

QUALITY SYSTEMS

The supplier's quality system shall meet one of the following:

- Approved to ISO9001 by an authorised third party assessment body
- Approved to AS9100 by an authorised third party assessment body
- Approved to TS16949 by an authorised third party assessment body
- Approved by William Hughes Ltd supplier audit questionnaire

William Hughes Ltd encourages the adoption of TS16949 and AS9100.

It may be necessary for a William Hughes auditor to perform an assessment at your company to look for specific product/process information. Following the assessment audit, a formal report recording the findings will be issued.

Any approval granted is on the understanding that the supplier will allow reasonable access of William Hughes Ltd representatives, its customers and/or regulatory authorities to their premises.

ORDERS

All purchase orders will state our order number. This number must be quoted on all documentation and in all communications concerning this order.

Every effort will be made to ensure that sufficient detail is given on the order. Any matter that requires clarification must be made known to our sales department prior to any work being started. William Hughes Ltd will not accept liability for the consequences of queries unresolved before work commences.

All Orders are placed subject to adherence to QAP 96 Supplier Quality Requirements (latest Issue)

The supplier must acknowledge all orders in writing, verbal or fax before processing. Material verification is required prior to manufacture.

SUPPLIER SUB-CONTRACTING

The supplier shall assume total responsibility for the quality of product and relevant documentation when using sub-contractors. Any purchasing documents should clearly describe the relevant drawings and/or specifications including issue status, appropriate quality requirements and Key Characteristic status (if applicable).

A copy of these supplier quality requirements shall be flowed down to any sub-contractor used for product intended for William Hughes Ltd.

CONTROL OF DOCUMENTS / RECORDS

It is expected that relevant controls and proper storage are applied.

It is expected that relevant controls of authorised signatures, stamps, etc are applied. Sample copies to be supplied if requested.

Quality records for aerospace components such as manufacturing information, final test/inspection and material certificates shall be retained for the life of the aircraft and be made available for review at any time by William Hughes Ltd in accordance with contract and/or regulatory requirements. Before disposing of Quality Records, written approval must be obtained from William Hughes Ltd Quality Manager

PRODUCT CERTIFICATION

All product delivered to William Hughes Ltd shall have a Certificate of Conformance (CofC). The CofC shall contain as a minimum:

- Unique number
- Date, name, title and signature of authorised company representative
- Supplier name
- Purchase order number
- Part number
- Issue
- Quantity
- Mill, cast or batch number (if applicable)

In addition, the following documentation shall also be provided with each delivery:

- Certificate of analysis
- In-process treatment documentation (Heat treatment, NDT, coatings etc)

IDENTIFICATION AND TRACEABILITY

Traceability is to be maintained by the supplier to ensure the product is traceable to source material. Failure to identify parts/product will possibly result in rejection of these items. Records of manufacture assembly and test/inspection are to be maintained.

CONCESSIONS / CHANGE REQUESTS

Should a supplier wish to make temporary changes to a drawing or specification, a request is to be submitted to William Hughes Ltd. This concession is to be approved.

William Hughes Ltd should be notified of any changes to product and/or processes that may impact on product quality/conformity.

NON-CONFORMING PRODUCT

Non-conforming product shall not be delivered unless formally authorised by William Hughes Ltd. It is the suppliers' responsibility to alert William Hughes Ltd of known or potential non-conforming product at the earliest opportunity.

In the event of non-conforming product being delivered, William Hughes Ltd will raise a reject note and 'Supplier Corrective Action Report'. Parts will be rejected with this documentation at the expense of the supplier. The supplier will be required to complete the 'Supplier Corrective Action Report' and return by the date requested. Corrective action is to be taken to avoid further rejection.

NOTIFICATION OF CHANGES

The supplier is to notify and obtain approval from William Hughes Ltd for any changes to product and or process, changes of supplier or changes to the manufacturing facility location

PACKING AND DELIVERY

All products supplied to William Hughes Ltd must be adequately protected against corrosion, contamination and damage.

All necessary documentation is to be included with the shipment (eg CofC, advice notes, test certificates etc).

Parts are not to be mixed.

SUPPLIERS OF AUTOMOTIVE PARTS/PROCESSES

As per TS 16949 (7.3.6.3) all contractual requirements to be clarified at contract review / product realisation stage prior to production. For example, William Hughes Ltd PPAP level 3 requirements.

VENDOR RATING

Supplier delivery and reject performance will be monitored; suppliers that do not maintain an acceptable performance level will be advised. Corrective actions must be taken to improve the area of concern and advised to William Hughes Ltd.

COUNTERFEIT MATERIAL/ PARTS

As per AS 9100D 8.1.4 suppliers shall ensure counterfeit material/ parts are NOT supplied to William Hughes Ltd. Processes shall be developed by the supplier to ensure counterfeit material/ parts do not enter the supply chain. William Hughes shall be informed immediately if it is suspected that counterfeit material/ parts have been supplied.

ETHICS POLICY

William Hughes require its suppliers to maintain and adhere to an Ethics policy which covers fair working practices for its employees. William Hughes expects this requirement to be flowed down the supply chain.

This document is the property of William Hughes Ltd. Any correspondence concerning this document should be directed to the Quality Department.
